*Fine Art Prints for Business & the Home*

*All Kessler Photography & Design Fine Art Prints* are original prints from film. The photographs are Giclee prints, printed on Epson's new **UltraChrome k3** archival inks and papers.

*Kessler Photography & Design's Canvas prints* are Giclee Canvas Prints. They are treated, after printing, with a semi-gloss liquid laminate. This is a clear protection that blocks **99% of UV light** in addition to:

- creating a water resistant surface
- abrasion resistant
- outdoor durable (put them in your patio/ courtyards!)
- non yellowing to maintain print colors

*All photographs are original images* that are printed from the film media they are photographed from. The only time digital manipulation is used is in the production of Kessler Photography & Design Fine Art Prints is, in the lab, to print the photography with digital ink printers. **No PhotoShop** manipulations are used to create these original fine art photographic images.
